

PFC PROFESSIONAL TWIN PORT BLEED BOTTLE

The PFC Brake bleed bottle makes bleeding your brakes easy, clean and quick, even when dealing with hot fluid in the course of battle.

- Developed for competition use and can be operated by one person
- Temperature resistant, suitable for bleeding hot or cold fluids
- Twin bleed enables both sides of the caliper to be bled at the same time
- Clear hoses gives visual inspection for air bubbles in the system
- High quality valves ensure no air enters the system

For the ultimate performance in your brake system always use RH665 Dot 4 Racing Brake Fluid

RH665 is not the same as other Racing Brake Fluids, it has been specially formulated for racing applications, where braking systems operate at very high temperatures. It is a complex mixture of Glycol Ether Borate Esters and Polyalkylene Glycol Ethers together with advanced corrosion inhibitors, antioxidants and other modifiers. The result is an exceptional brake fluid with not only a very high boiling point but which also conforms to FMVSS 116 DOT 4 and maintains its class leading viscosity, lubricity and compressibility performance at extreme temperatures to ensure braking system reliability and performance and a Rock Hard pedal.

Highest Boiling Point Brake Fluid on the Market • Road Legal • Rock Hard Pedal
